

To strengthen our development team, we are looking for

Project Engineer (m/w/d)

Technical project manager, Location: Frutigen / Canton Bern / Switzerland

Your Challenge

- You take responsibility for challenging projects and are in direct contact with our customers
- You configure complex control systems
- You specify project-related SW modules and form the interface to the development team
- You create implementation specifications based on customer requirements
- You put your system into operation on the highway or in the tunnel

Your Profile

- You have a basic education as a computer scientist or automation engineer (further education HF / FH is an advantage)
- Experience in control technology, application and system configuration is a plus
- Windows, Linux, virtualized systems and TCP/IP networks are not foreign concepts to you
- You are an open, innovative personality with stamina and a sense of quality and humor
- You are interested in innovative solutions and think outside the box
- You have good German language skills and English is not foreign to you

Your Benefit

- An employer where your input carries weight
- Wide scope for creativity and responsibility
- Interesting and varied tasks in a growing industry environment
- Opportunities to help shape the future of transport
- Further training that promotes and challenges your personal strengths
- Cooperative working environment and open company culture with contact to the international SWARCO team
- Joint fitness training and regular barbecue evenings on the company's own terrace

Would you like to contribute your knowledge, take on responsibility and become part of our team?
Then we look forward to receiving your application documents by e-mail to jobs@bergauer.ch.
